Ole Einar Björndalen

The future of cross
country skiing is
in your hands.

Exel X-Curve Series

What makes it special?

Nearly **20%** more propulsion power with each push.

1. Maintaining maximum speed for **longer**

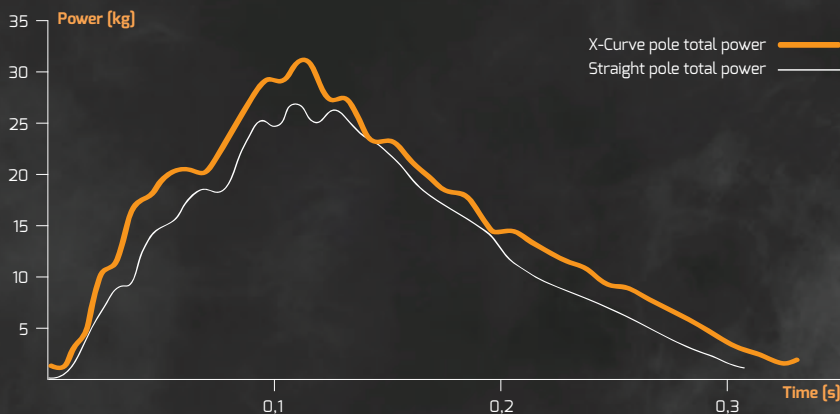

2. More **economical** skiing

3. **Greater final speed** in acceleration

4. Reaching maximum speed **faster**

5. **More efficient** skiing posture biomechanics

Power difference between X-Curve and traditional pole
